

# BORZOI INU

## WHITEPAPER

**[BORZTOKEN.COM](https://BORZTOKEN.COM)**

# The Prophecy

The prophecy says the Binance Smart Chain will give birth to a wolfhound made of bear market fear & bull market euphoria.

2023 is the year in which Borzoi Inu will be created, the name that comes along with this token is Wolfgang, Wolfgang the Borzoi.

His destiny is to reach the moon and take a bite out of it.

Whilst his teeth sink into the orbit he then leaves his mark on the crypto universe, taking all its holders along with it.

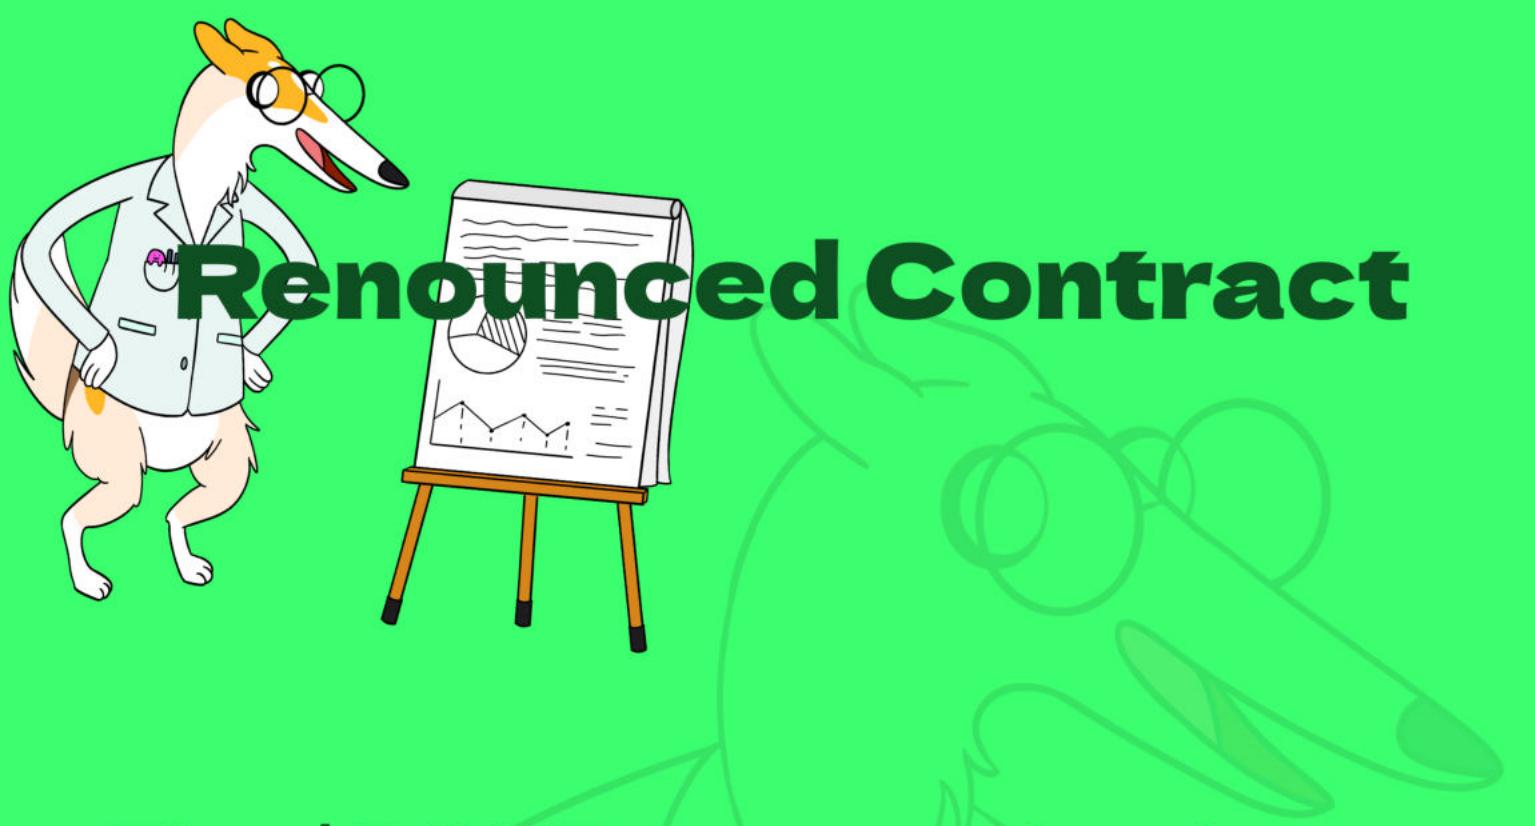

# **Wolfgang the Borzoi**

**\$BORZ is a decentralized  
wolfhound token living on the  
Binance Smart Chain.**

Born in 2023 it appears to have  
caught the hearts of many across  
the vast ocean of the internet.

His name is Wolfgang the Borzoi,  
originally bred to hunt wolves,  
he now hunts the moon on the  
blockchain, and he'll stop at  
nothing short of chewing it.

# Renounced Contract

The \$BORZ contract has been fully renounced, the deployer wallet cannot make anymore changes to it.

The marketing wallet is the only one who can call the functions needed to use the marketing funds from the 5% taxes in order to further promote the token.

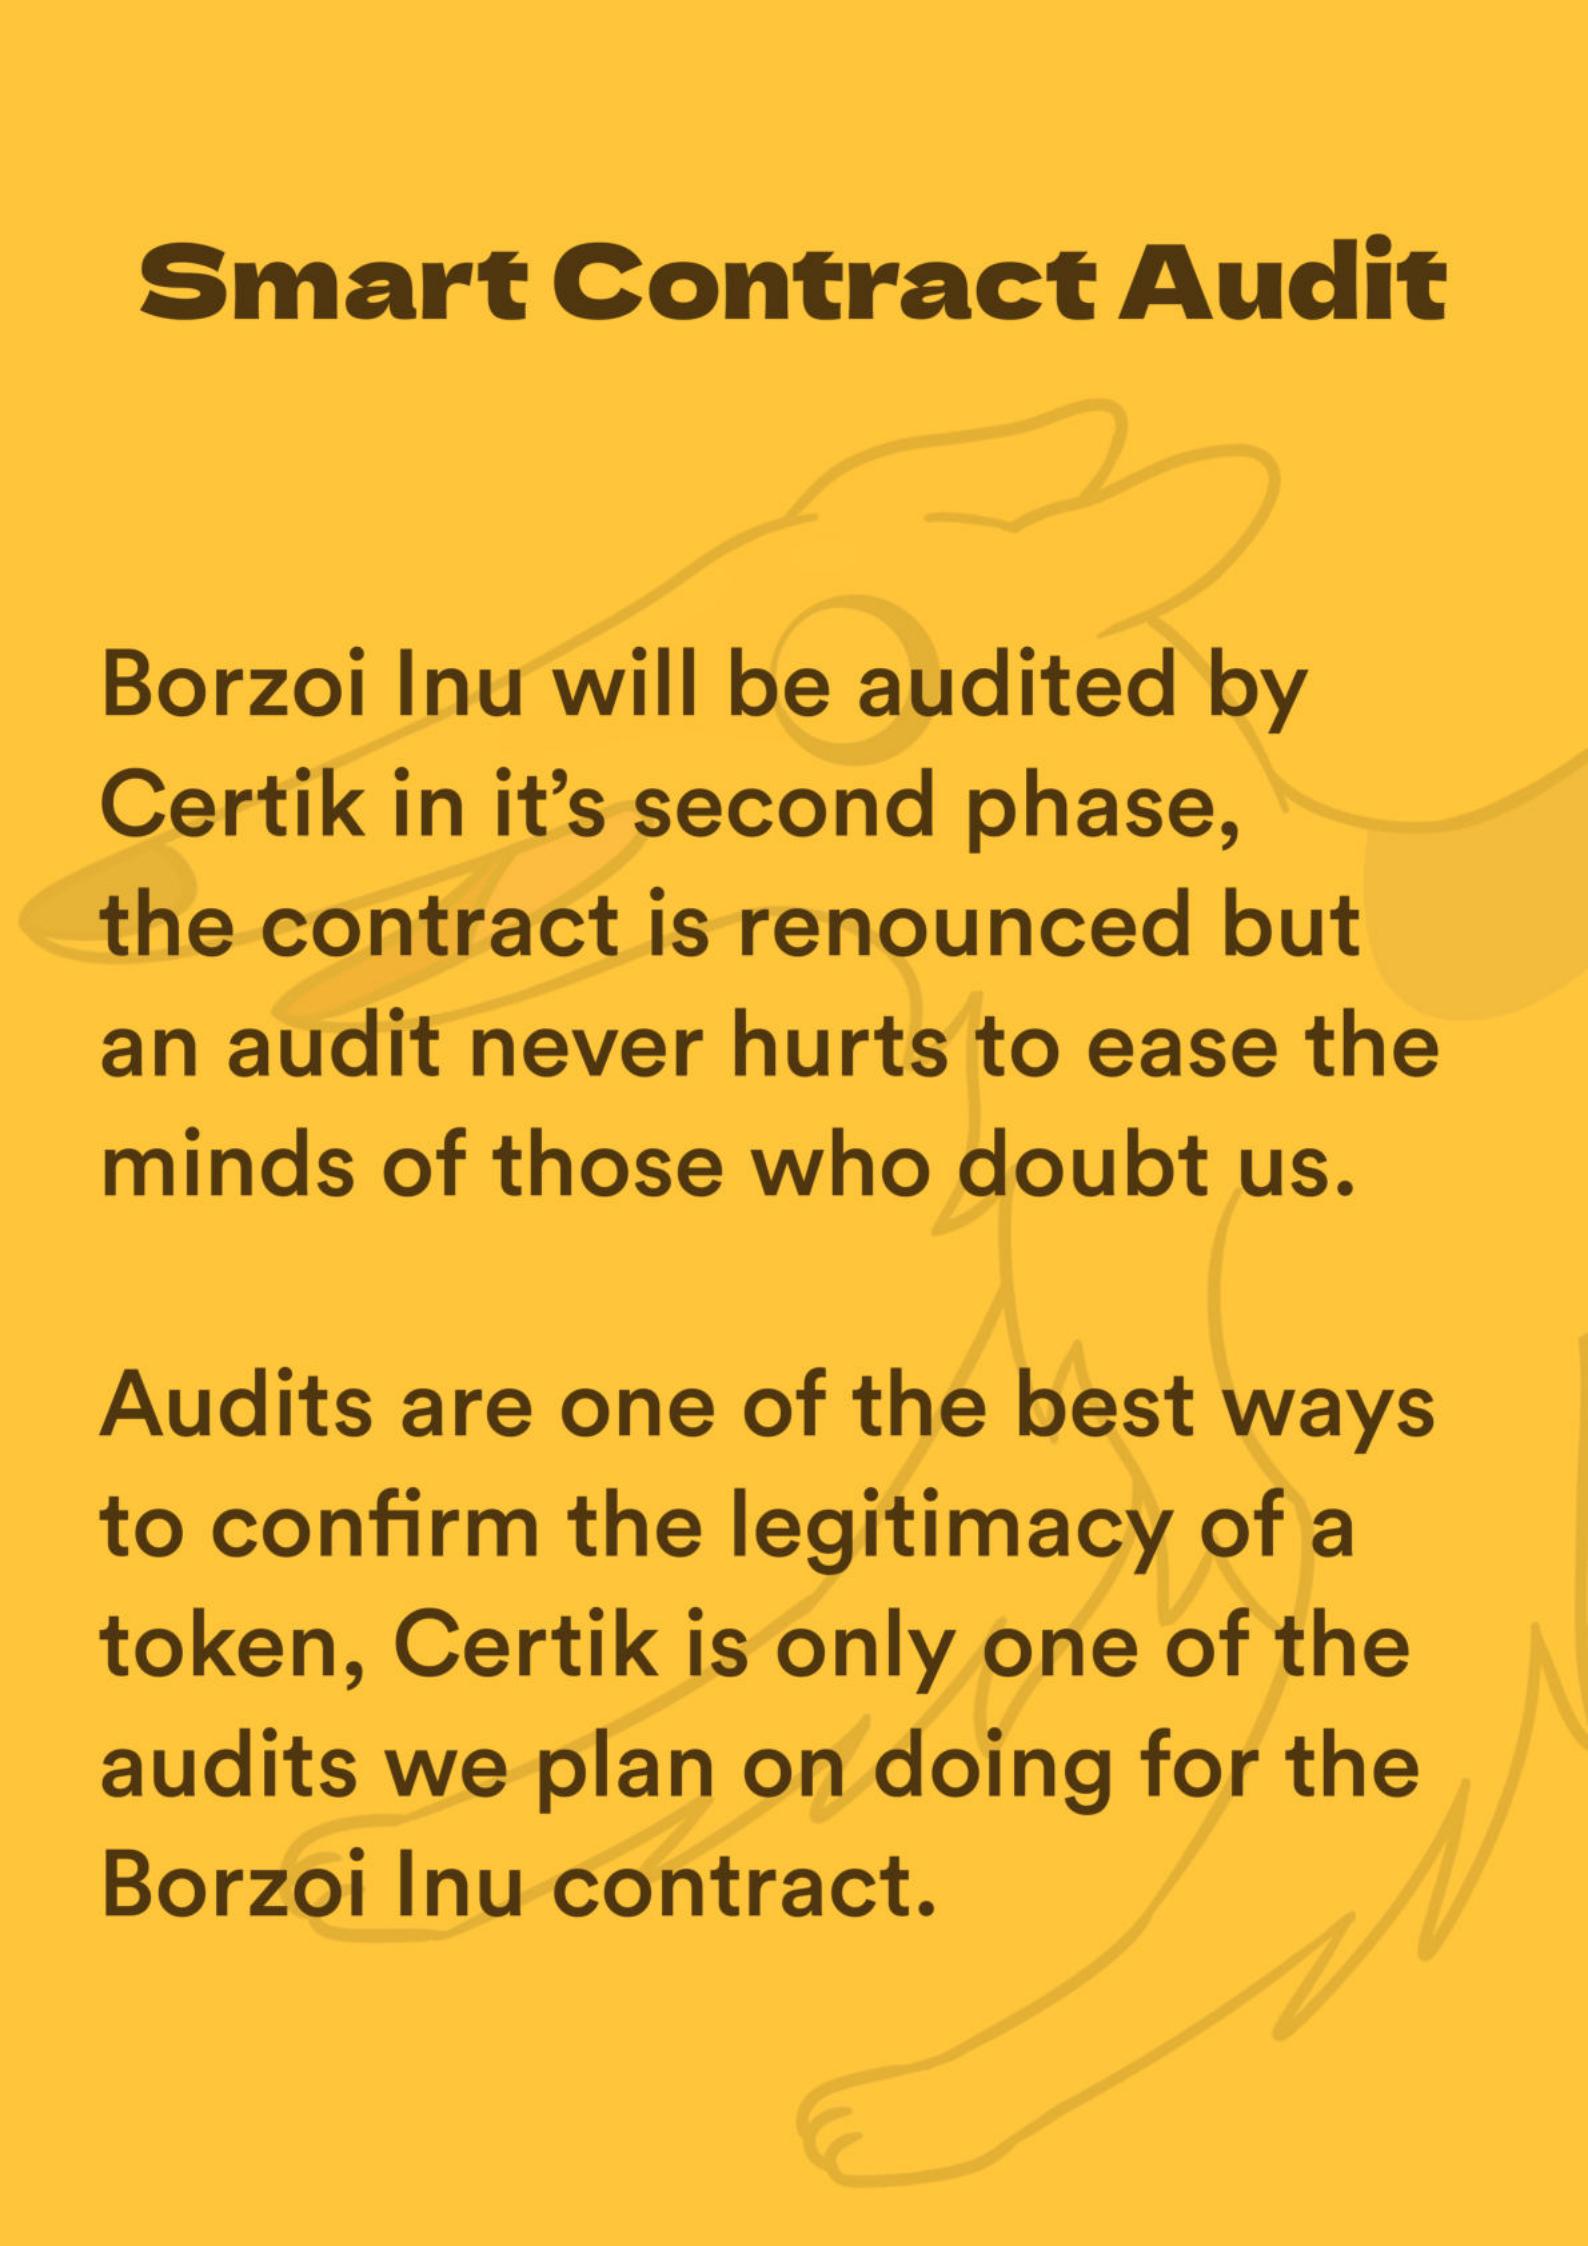

# Total Supply

There are a total of 1 billion \$BORZ tokens, and the supply is only getting smaller by the day with burning events planned further down the line.

We plan on introducing a staking & burning system, more information about that is available later down the whitepaper rabbit hole.

# **Smart Contract Audit**

**Borzoi Inu will be audited by Certik in it's second phase, the contract is renounced but an audit never hurts to ease the minds of those who doubt us.**

**Audits are one of the best ways to confirm the legitimacy of a token, Certik is only one of the audits we plan on doing for the Borzoi Inu contract.**

# **Crypto Payments**

Once \$BORZ goes cross-chain, Borzoi Inu will start its journey to be used as payment method, starting off with small websites, moving on to bigger and better things.

BitPay & CoinBase are one of the crypto payment gateways we plan to get Borzoi Inu on.

# Liquidity Lock

We've locked the liquidity for 1 month initially, however, if the community decides, we will lock it for another 1 month before the lock expires, and 3 months after that.

Before the 3 months lock expires we will ask the community if we should lock the liquidity again, and if the answer is yes, the liquidity will be locked for 1 year.

# **The Long Snout Eco-System**

‘Real world use case’ is thrown around a lot in the crypto world, but they never seem to be specific about anything or have any actual use cases.

Wolfgang has grown tired of this term, for it doesn’t mean what it used to once mean.

Wolfgang the Borzoi created The Long Snout Eco-System, the next few pages explain what this is all about!

# **Cross-Chain**

**\$BORZ goes cross-chain:**

**\$BORZ plans to expand its long snout across multiple chains, starting with POLYGON, ETHEREUM & SOLANA coming soon after.**

The volume of multiple chains will sky rocket the token, and Wolfgang the Borzoi will sink his teeth into the moon, realizing his destiny and fulfilling the foretold prophecy.

# **The Long Snout NFT Collection**

**The Playful Wolfhound stage will include an NFT collection, we plan on letting people mint their own NFT's with the king of long snouts.**

**Available on the Binance Smart Chain for starters, anyone will be able to mint their very own Borzoi, you can even name it if you'd like!**

# **Burn Mechanism**

A burn mechanism will be introduced to help reduce supply and increase value, taxes from buying, selling and transferring will burn a % of the transaction amount.

Slowly but surely the supply will decrease and demand will increase, meaning steady growth for Borzoi Inu even in the most dire of market conditions.

# **Staking Mechanism**

**Staking is also planned on The Long Snout Eco-System, users will able to stake their \$BORZ tokens and will receive rewards in exchange, passive income at your disposal!**

**Once the staking mechanism is released, the holders will receive rewards from taxes, great for long term holders who are here for the long haul!**

# **Long Nose Watch**

Price watch platform for tokens and coins, including a trust meter for each of the listings, judging by the quality of the contract, the available liquidity & more.

You'll be able to track your portfolio and compare tokens here, much like a website we all know and love, but with a twist when it comes to the trust factor of each listed token/coin.
